

# Sakib Sayyed

+91-9156793756 | engsakib92@gmail.com | linkedin.com/in/sakibali-sayyed/ | Pune, India

## Summary

AI/ML Engineer with hands-on experience in Machine Learning, Data Science, NLP, Generative AI, LLM and Data Engineering. Skilled in building end-to-end ML pipelines, predictive models, ETL workflows, cloud deployment, and AI-powered applications using Python, Scikit-learn, LangChain, OpenAI APIs, SQL, MongoDB, and Google Cloud Platform. Experienced in Explainable AI (SHAP, LIME), feature engineering, model optimization, and full-stack development. Passionate about developing scalable AI solutions that drive business intelligence, automation, and data-driven decision making.

## Technical Skills

**Languages:** Python, HTML/CSS, Java (Basics), JavaScript, SQL

**Machine Learning:** Scikit-learn, XGBoost, Random Forest, Regression, Classification, Clustering, Feature Engineering, Feature Selection

**Deep Learning:** TensorFlow, PyTorch, Neural Networks

**Generative AI & NLP:** LangChain, OpenAI API, Prompt Engineering, LLMs, RAG, NLP, Vector Databases

**Databases:** PostgreSQL, MongoDB, Oracle

**Frameworks:** React.js, FastAPI, REST APIs

**Developer Tools:** Git, GitHub, VS Code, Power BI, Docker, Jupyter Notebook

## Internship Experience

### AI/ML Intern

Sep. 2025 – Feb. 2026

*Thynk Tech India*

*Pune, India*

- Developed and deployed 3+ machine learning models using Python, Scikit-learn, and Pandas for an EdTech platform serving 500+ users.
- Performed data preprocessing, feature engineering, and model evaluation on real-world datasets, improving model accuracy by 15% across iterative training cycles.
- Designed and optimized data pipelines using JSON processing, reducing data handling time by 30% and enabling faster downstream model training.
- Translated business requirements into AI-driven features, improving recommendation systems and personalized learning experiences for 500+ active users.
- Gained hands-on experience across the end-to-end ML lifecycle including data collection, training, validation, and deployment on Google Cloud Platform.

## Projects

### Enterprise AI-Powered Business Intelligence Dashboard | *Python, Scikit-learn, SQL, Pandas, MongoDB, NLP, ETL*

- Developed a full-stack dashboard integrating 5+ business modules including sales forecasting, attrition prediction, and customer segmentation with real-time automated alerts via scalable ETL pipelines.
- Reduced manual analysis effort by 50% through automated ML workflows; models delivered consistent accuracy across 10K+ records with sub-second inference latency.

### Explainable AI Aircraft Failure Prediction System | *Python, Scikit-learn, Pandas, SHAP, LIME*

- Built an explainable AI system to detect aircraft component failures achieving 90%+ classification accuracy across multi-class fault categories.
- Applied SHAP and LIME interpretability techniques to reduce fault diagnosis time by 40%, making safety-critical model decisions auditable for domain engineers.

### Generative AI Restaurant Content Generator | *LangChain, OpenAI API, Python, NLP, Prompt Engineering*

- Developed an AI-powered application generating restaurant names and custom menus for 10+ cuisine types using LangChain and OpenAI API with advanced prompt engineering.
- Reduced manual content creation effort by 60% via NLP-driven personalization pipelines delivering context-aware menus tailored to user preferences.

## Education

### ISBM College of Engineering

*Bachelor of Engineering in Artificial Intelligence and Data Science*

Sep. 2022 – Present

*Pune, Maharashtra*

## Certifications

**Python for ML** – Coursera (2024)

**Generative AI Fundamentals** – Google Cloud (2025)

**Python Foundation Certification** – Infosys Springboard (2025)
