Summary

AI/ML Engineer with hands-on experience in Machine Learning, Data Science, NLP, Generative AI, LLM and Data Engineering. Skilled in building end-to-end ML pipelines, predictive models, ETL workflows, cloud deployment, and AI-powered applications using Python, Scikit-learn, LangChain, OpenAI APIs, SQL, MongoDB, and Google Cloud Platform. Experienced in Explainable AI (SHAP, LIME), feature engineering, model optimization, and full-stack development. Passionate about developing scalable AI solutions that drive business intelligence, automation, and data-driven decision making.

Technical Skills

Languages: Python, HTML/CSS, Java (Basics), JavaScript, SQL

Machine Learning: Scikit-learn, XGBoost, Random Forest, Regression, Classification, Clustering, Feature Engineering, Feature Selection

Deep Learning: Generative AI, TensorFlow, PyTorch, Neural Networks

Generative AI & NLP: LangChain, OpenAI API, Prompt Engineering, LLMs, RAG, NLP, Vector Databases

Databases: PostgreSQL, MongoDB, Oracle

Frameworks: React.js, FastAPI, REST APIs

Developer Tools: Git, GitHub, VS Code, Power BI, Docker, Jupyter Notebook

Internship Experience

AI/ML Intern

Sep. 2025 – Feb. 2026

Thynk Tech India

Pune, India

- Developed and deployed 3+ machine learning models using Python, Scikit-learn, and Pandas for an EdTech platform serving 500+ users.
- Performed data preprocessing, feature engineering, and model evaluation on real-world datasets, improving model accuracy by 15% across iterative training cycles.
- Designed and optimized data pipelines using JSON processing, reducing data handling time by 30% and enabling faster downstream model training.
- Translated business requirements into AI-driven features, improving recommendation systems and personalized learning experiences for 500+ active users, across the end-to-end ML lifecycle on Google Cloud Platform.

Projects

Biomedical Graph RAG – Multi-Hop Knowledge Graph Reasoning Engine | [Live Demo](#)

Python, FastAPI, SQLite, Cypher, OpenAI API, Ollama, RAGAS, Docker

- Architected an end-to-end Graph RAG platform traversing 2.25M+ relationships and 47K+ nodes across 24 edge types, enabling complex 1- to 4-hop multi-entity reasoning.
- Engineered a hybrid retrieval pipeline with parameterized Cypher templates, schema-aware Text-to-Cypher fallback, and a 4-tier security guardrail against write-injection.

Explainable AI Aircraft Failure Prediction System

Python, Scikit-learn, Pandas, SHAP, LIME

- Built an explainable AI system to detect aircraft component failures achieving 90%+ classification accuracy across multi-class fault categories.
- Applied SHAP and LIME interpretability techniques to reduce fault diagnosis time by 40%, making safety-critical model decisions auditable for domain engineers.

FinSight – AI Financial Intelligence & Forecasting Platform | [Live Demo](#)

Python, FastAPI, React, TypeScript, Scikit-learn

- Architected an end-to-end financial intelligence platform analyzing Rs. 184.5 Cr ARR across 50,000+ ledger records, cutting forecasting turnaround from 14 days to under 3 minutes.
- Built dual SARIMAX/Holt-Winters forecasting models (94.2% accuracy, MAPE < 4.8%) plus an anomaly-detection engine that flagged Rs. 3.2 Cr in reporting risk.

Education

ISBM College of Engineering

Bachelor of Engineering in Artificial Intelligence and Data Science

Sep. 2022 – 2026

Pune, Maharashtra

Certifications

Python for ML – Coursera (2024)

Generative AI Fundamentals – Google Cloud (2025)

Python Foundation Certification – Infosys Springboard (2025)
